Schuylkill Rehabilitation Center

Schuylkill Rehabilitation Center brings together a full range of services in a team approach to treat neurological and orthopedic disorders. Our experienced team is committed to providing quality rehabilitation. State-of-the-art facilities and equipment allow this dedicated team to focus on results. Services include:

Physician Services

As a patient at Schuylkill Rehabilitation Center, your care will be under the direction of a **Physiatrist** (Physician specializing in physical medicine). Our medical staff works closely with your family doctor, your family and our team of therapists to assist you throughout your recovery process.

Physical Therapy

Helping you to achieve a maximum level of independence and productivity is the challenge of your Physical Therapist. Whether it's getting you back on your feet, relieving pain, or strengthening weakened muscles, exercise is the "heart" of Physical Therapy. The *art* lies in adapting it to your individual needs.

Occupational Therapy

We take for granted many of the Activities of Daily Living (ADL), until the day we lose the ability to perform such relatively simple tasks such as dressing, bathing, or eating, which are things that make us independent and self-sufficient. Your Occupational Therapist will work with you to help you re-learn these and other skills to improve your quality of life.

Lymphedema Management ... performed by licensed O.T. certified in the LeDuc method, who provide manual lymphatic drainage, multi-layered compression bandaging, compression garment fitting and educational precautions to help clients manage the symptoms associated with this condition.

Sports Medicine... working with an Athletic Trainer, Physical Therapist, and Physician, SRC provides clinics to evaluate, treat, and prevent sports related injuries.

Workinetics ... providing work conditioning and job simulation to get employees back to work. Functional Capacity Evaluations and onsite job assessments are also provided.

Hand Therapy... using state-of-the-art technology and specially trained Occupational Therapists to evaluate and treat injuries of the hand and wrist.

Aquatic Therapy... this pool was custom built for SRC and is equipped with an underwater treadmill, underwater video cameras, and a hydraulic lift. This pool is capable of accommodating a variety of Physical Therapy needs.

Golf Enhancement... this program enables a golfer to improve their flexibility, strength and body awareness during the golf swing motion.

Prosthetic Services ... from your initial examination by the physician, the fitting, delivery, and training in the use of an artificial limb.

Orthotic Services ... helping clients overcome the pain and limitations of orthopedic, arthritic and neuromuscular challenges.

Speech Pathology

Losing the ability to express yourself to others can be extremely frustrating. When communication skills are impaired, your interactions with others are also impaired. Our Speech Pathologist will work with you to improve and maximally restore the areas of communication that are vital to those interactions.

Community Education... the SRC team provides educational seminars to local high school, youth coaches, industrial facilities, and the general public on a variety of topics such as common injuries / illnesses, first-aid, and injury prevention.

Psychological Services

A traumatic injury or illness not only affects your body, but the whole person. Our Staff Psychologist will work with you to adapt behaviors and lifestyles, which contribute to overall health and fitness, restoring both dignity and control to your life.

Social Work Services

Our Social Worker will guide you and your family in adjusting emotionally and socially to family and community life. We will assist in contacting community agencies whose services facilitate the community re-entry process.

Support Groups... SRC provides support groups for people dealing with the physical and emotional challenges of MS, Fibromyalgia/Chronic Pain, Stroke, Parkinson's, Traumatic Brain Injury and Amputation.
